PLEASE READ THIS SECTION CAREFULLY. IF YOU ARE IN ANY DOUBT
AS TO THE ACTION YOU SHOULD TAKE, YOU ARE ADVISED TO
CONSULT YOUR LEGAL, FINANCIAL, TAX, OR OTHER PROFESSIONAL
ADVISOR(S).

The information listed below may not be exhaustive and does not imply any element of the contractual relationship. While we strive to ensure that all elements of this document are accurate and up-to-date, this material does not constitute professional advice. Alvado token does not warrant or accept any legal liability arising from the accuracy, reliability, timeliness or completeness of any content in this document. Contributors, sponsors, and potential Alvado token holders must seek appropriate independent professional advice before relying on any material-based obligation or transaction published in this document for which material is published for reference only. Alvado token investments are not intended to create titles in any jurisdiction. This document does not constitute a prospectus or an offer of any kind and does not imply that it is an offer of securities or an application for investment in securities in any jurisdiction whatsoever.

IMPORTANT NOTICE:

Read the following note carefully before reading this document prepared by the company ("Whitepaper"). This notice applies to everyone who has read this document. Please note that this notice can be modified or updated. The white paper of Alvado token, No shares or other securities of the Company are offered for subscription or sale in any jurisdiction in accordance with the Whitepaper. The whitepaper is publicly available for information purposes only and does not require any action by the public or shareholders of the Company. The Whitepaper does not constitute an offer or invitation to anyone to enter ALVADOTOKEN or register shares or other securities in the Company. Currently, the Company's shares are not offered for registration under the Securities Act of any country or a securities law of any country. No one is obligated to enter into any contract or legal obligation to sell, purchase, sponsor or contribute to the growth of alvado token.

FORWARD-LOOKING STATEMENTS

Some of the statements in the Whitepaper include forward-looking statements which reflect Alvado token's current views with respect to product development, execution roadmap, financial performance, business strategy and future plans, both with respect to the Company and the sectors and industries in which the Company operates. Statements which include the words "expects", "intends", "plans", "believes", "projects", "anticipates", "will", "targets", "aims", "may", "would", "could", "continue" (and any conjugation thereof) and any similar statements are of a future or forward-looking nature. All forward-looking statements address matters that involve risks and uncertainties. Accordingly, there are or will be important factors that could cause the actual results to differ materially from those indicated in these statements. These factors include but are not limited to those described in the part of the Whitepaper entitled "Risk Factors", which should be read in conjunction with the other cautionary statements that are included in the Whitepaper. Any forward-looking statements in the Whitepaper reflect the current views with respect to future events and are subject to these and other risks, uncertainties, and assumptions relating to the operations, results of operations and growth strategy. These forward-looking statements speak only as of ALVADO TOKEN the date of the Whitepaper. Subject to industry acceptable disclosure and transparency rules and common practices, the Company undertakes no obligation publicly to update or review any forward-looking statement, whether as a result of new information, future developments or otherwise. All subsequent written and oral forward-looking statements attributable to the Company or individuals acting on behalf of the Company are expressly qualified in their entirety by this paragraph. Prospective buyers or Crowd-funding contributors or sponsors of Alvado token should specifically consider the factors identified in the Whitepaper, which could cause actual results to differ before making a purchase, contribution or sponsorship decision. No statement in the Whitepaper is intended as a profit forecast and no statement in the Whitepaper should be interpreted to mean that the earnings of the Company for the current or future years would be as may be implied in this Whitepaper. I hereby acknowledge that I have read and understood the notices and disclaimers set out above.

ABSTRACT

Alvado- it a unique global gaming platform that utilizes all parts of gaming industry eco system where players, developers, traders, and game community can transform their time and needs in money using gaming token called alvado token. It is simultaneously a platform for competitive gaming, a market place for games, online broadcasting {streams} and a platform for trades in terms of games.

Alvado mission is to revolutionize the \$100+ billion a year gaming industry by creating a platform for a new class of game that live on the blockchain. Blockchain games completely redefine the relationship between player's and developers by allowing for:

- 1} True ownership of in-game characters and assets**
- 2} Cooperative / competitive global play**
- 3} Cheap and save game item trading**
- 4} True micro transaction**
- 5} Cross – game compatibility of items and currency**
- 6} Development of robust in- game economic system**
- 7} Zero fraud**

Introduction

Collectively gaming industry has over 2.3billion users who produce massive revenue and value for entrepreneurs and companies (\$105billion yearly). A turnover of transaction that is going through gaming platform is growing exponentially but at the same time it leads to some issues.

One of the problems is lack of liquidity in the system. Gamers spend hours to improve their competitive skills and winning rate, collect rare artifacts, improve their characters but when they want to do any of these they have to rely on a centralized system that most external marketplace provides .

We offer a system that will make players get reward for matchmaking competitions, audience and developers will get there commission on certain games and competitions as well

With the help of blockchain the whole process will be transparent and automated, which will make/e the platform strong and healthy.

Alvado vision is to cover the global market in the gaming space that will benefit both the users and the stake holder.

Market overview

The Evolution of Gaming

Gaming is one of the oldest form of human social interactions, with archaeological evidence of crude games dating back over 5,000 years electronic video games first appeared in the 1950s, and achieved initial commercial success in 1970s with the Atari gaming system such as Pong entering home across the world.

Video game technology graphics and design have improved by orders of magnitude over the past 50 years. What was once considered part of Greek or nerd culture has evolved into the part of everyday life. It is difficult to find anyone born in the 1990 who is not a regular gamer, while game like Candy Crush, Farm Heroes and online slots have really been successful with an older primarily with the female audience. Collectively as a species, we are spending more and more time with our eye glued on the screen of our TVs, Computers Mobile Phone Tablets etc. Behind many of those screens are games.

Video game business model has undergone significant changes over the years. In the early days, computer and console games were one-time purchases, typically costing \$50-\$60 arcade games were pay to play with gamers inserting coin into machines and play until the lives run out.

The internet allowed gamers to connect and play with each other for the first time online. MMORPG {massively multiplayer online role gamers} such as Ultimate Online, EverQuest etc where gamers not only pay to purchase them, but an additional \$10-\$20 as monthly subscription fee as well. In exchange for these monthly fees developers would release updates to the game advancing the content story and features.

Cases Of Blockchain Games

Early Blockchain Games

Gaming on the blockchain is a fairly new concept. Spells of Genesis, a collectible card RPG by Everdreamsoft, was released in May of 2017. The game allows for the tokenization of cards, which are savable to players' digital wallets. While the game became popular within a small circle of blockchain aficionados, it was, unfortunately, not quite ready for mass adoption.

In November of 2017, a game was launched on the Ethereum blockchain that nearly broke it. That game, as anyone who follows cryptocurrencies is surely familiar with, was Crypto Kitties.

Crypto Kitties is a fairly simple pet breeding game that has enjoyed massive success, at one point generating nearly a third of the Ethereum network's daily transaction count. The game is the first to utilize smart contracts to control core game mechanics. Code to key systems like breeding, trade, and new kitty issuance are publicly available, while the "secret sauce" which makes the game fun (in the

case of Crypto Kitties, the algorithms that determine the genetic makeup of newly-bred cats) is hidden out of sight. The game is also unique in the fact that the “kitties” acquired are not stored on the developer’s servers, but rather in the form of non-fungible ERC721 tokens in the player’s wallet. They belong to the player, and the player alone. They cannot be revoked by the developer or restricted in any way from being bought, sold, or traded. While this may not seem significant to some, it is game-changing (no pun intended) to the video game industry. Power is being put back into gamers’ hands, and a handful of players have even been lucky enough to generate a financial return on their “kitty investments.”

It has been said by some that CryptoKitties is the first true non-financial application to run on any blockchain protocol. While the game is entertaining, it remains difficult to say how it will perform over the long term. Regardless, it has opened the door to what is sure to be a massive new industry

Blockchain-based games are able to resolve many issues that have plagued game developers and players alike over the past decade.

True Ownership of In-Game Characters and Assets

Before the advent of blockchain technology, it would have been difficult to conceive of players owning any digital asset inside of an online video game.

Alvado token Blockchain

Alvado token is a decentralized artificial intelligence gaming platform on blockchain technology. Where developers, develop games on the platform and push it to the Alvado token marketplace. Players pick up any games in the marketplace and challenge each with the Alvado token. The audience sees current challenge and sees starts of each player and stake on any player's to win the challenge base on odd system.

Alvado allows every player to compete from the list of available games and earn opponent money after a successful win.

In other to make the system a transparent matchmaking process our system will use a smart contract. In this way we will have various game that each player can join depending on the kind of torment.

After the game has ended a player takes the reward which will be in alvadotoken. There will be some transaction fee for each game. The withdrawal will be done in Alvado token and later be exchanged outside the platform in other exchanges.

Benefits of the system to the developers

The Alvado token team will develop a Lab tool for game developer which will consist of all programming languages

The system will make tools and material available for developers to and also allow them to make use of any programming language they desire in other to create their desired game, even if you have no

knowledge in programming language, Alvado token has a system designed for such people which is called "do for me" which can be used in any categories for games. These tools can make the developers use any programming language that they wish to use in developing the game's such as sport game's, arcade race, puzzle games, adventure game's, educational games, combat games, real time strategy, action game's etc. This games kind me played online or offline this will base on the developer

After developing games using Alvado token lab tools, developers will require or need Alvado token for gas to push their games or assets to the Alvado token market place.

Before you can push any game to the market you need to have Alvado token deposited which will be used to process any transaction the developer wants to make, after the developer must have pushed the game.

- Easy account registration.
- Quick verification of game.
- Availability of material and tools.
- Do for me system

Benefits of the system to the players

The Alvado token open market: this is a decentralized and artificial intelligent market place where all games and assets that have been developed are pushed here.

All game's assets, tournament and challenge can be seen here. Players can come in here to pick up any game of their choice to play, to challenge, to join any tournament and they can also buy any game asset that are in the market using alvado token.

Player's make money by challenging other player's on any game or by joining tournaments and winning. An AI smart recording using blockchain technology to record each player games stats on any game they play which is visible to the community. These stats are used to determine how good a player is on that game.

There will be different tournament whereby there will be different stages of tournament, we will have the global tournament, continental tournament, state tournament, and City tournaments, One on One challenge, Family and Friends tournaments. It can therefore be organized by the company or parties interested in the tournament.

One on one challenge- players come to the market, select game of their choice, select an opponent and both agree on the terms of their challenge, the system rewards the player's based on the terms agreed on autopilot.

For tournament, we have two types of tournaments which are the community tournaments and the alvado token tournaments.

Community tournaments- community tournaments are organized by players. They sets the rules and reward using our AL tool which is develop for that.

Alvado token Tournaments: This type of tournaments are organized by the company and the company set the rules and prizes for this type of tournaments.

- Ability to earn money, using your gaming skills
 - Mobile game support
 - Varieties of games
 - Healthy community
 - Knowledge that every transaction is save and transparent due to decentralize system
 - Various tournaments.
- Wallet system
 - Artificial intelligence system and statistics

Benefits of the system to the audience

The audience comes to the marketplace and watches ongoing challenges or tournaments pick up a player to stake on. Automatic stats are shown on each players base on the game .an automatic odd are been generated for the player's which the audience sees and stake on using Alvado token.

1. There will be an odd system for the audience that will be used on any game challenge. The audience has the right to pick any player and stake using alvado token to stake on the player. game challenge, if a player you stake wins you get your winnings calculated base on the odd but but if loss it will be lost and the the token will he shared with the developer and the Alvado token company with a share ratio of developer 70% and company 30% that will be used to run the community.
 - Odd system.
 - Ability to bet on any players/game
 - Ability to video stream

Other Benefits for the community

Developers have the ability to advertise their games.

Players have the ability to run campaign on the stat.

3rd Parties advertisements

Mining of Alvado token

Ways of mining Alvado token is through “staking” .The Company will have two types of staking

Staking P1; this is through deposit of Alvado token into alvado wallet which you get token drop in the wallet monthly.

1st year 40%

2nd year 35%

3rd year 10%

From the 3rd year below will be 10% yearly

Staking P2: This will be very different from the Staking P1. This is where the Alvado token company share profits shares with Alvado token community. Out of 100% of the company shares the company will allocate 20% shares to the staking P2 will be assigned amount of Alvado token to be deposited in the staking wallet P2. Profits shares will be has follows

Share 1: stake 1000-10,000 Alvado token and get profits shares from the company worth 5% monthly

Share 2: stake 10,001-1,000,000 Alvado token and get profits shares from the company worth 9% monthly

Share 3: stake 1,000,001- and above Alvado token and get profits shares from the company worth 11% monthly

All of this are built on our blockchain and works automatically. This Benefits us by removing of human errors

Summary

Alvado token is a decentralized blockchain that allows people to come together create, play and bet on game and also gives everyone the opportunity to make money and then have fun.

It allows the developer to create any game of their choice using any programming language they desire the system will make available tools for creating games the developer can also import games they have created into alvado market in order to enable the player to pick any game they desire.

The player can pick any game they desire to join any tournament and compete with anyone and still make their money after the winner takes all from any competition they partake in .

The system also allows the audience to bet on any player or tournament using the odd system.

If any player wins a game the prize will be in Alvado token and they will be allowed to withdraw and exchange in the exchange market, also before a developer can push his game to the market you will need to have certain Alvado token in your wallet same also applies to the player.

Road map

2018 - March 24th the Alvado Studio started

2019- January Ideal of Alvado token into blockchain

2019- March Research work started

2020- April Launch of the pre-ico

2020- May Ico Launch

2020- June - July small and medium exchange listing

2020- September Big Exchange Listing

2020 - November- December platform launch

2021- Q1 launch of the Alvado token Apps on all Platforms. Advertisement and partnership

2021- Q2 and Q3 the release of staking wallet both Staking P1 and Staking P2 wallet open for user

2021- Q4 The Testing of Alvado token product. This will be tested and it will open new market for our developers. Games will be developed on Blockchain using our Products.

2022- Q1 & Q2 Sales and distribution of our Products to the world.

2022- Q3 & Q4 More development of the systems i.e. our platform, apps and Products.

2022- Commence of building Alvado token gaming centers all over the world

2023- Developments and continuous upgrade of our Systems
